APS, do not increase rates. We are paying enough as it is. Don't be greedy. The Bible does say, "do not worship god and money." You cannot serve true masters. Leave our rates as they are. Please. We've had enough already!

I don't understand the necessity for the rate hike. Major cost of power generation (fuel) has decreased in price by 40%.

Clearly renewable energy is the future and it should be seen as not only environmentally responsible but ultimately economically necessary. For way too long humans have viewed all natural resources as virtually unlimited; they are not! The industry and the regulatory agencies are doing a terrible job with this and seem to be completely absorbed with making the same or more revenue using the existing outdated models.

We have had solar since November 2009. It is the best investment and upgrade to our home in Goodyear that we have ever done. It is time to eliminate the subsidy to the electric utilities that operate as a monopoly and are subsidized by the taxpayers of Arizona. Their business will be obsolete in 20 years or less.

When AZ is the perfect place to be using solar power, why is APS trying to make its use more expensive? APS needs to become more inclusive of solar, not the reverse. Resident of Bethany Villas and homeowner's association.
